THE WEATHER REPORT.

Official Record and Forecast.—Washington, Dec. 6. The southwest disturbance has finally moved to the northeastward, with little energy, and it is central to-night over Lakes Superior and Michigan, with a slight secondary disturbance over extreme east-central Iowa. The rain area attending the disturbance during the last twenty-four hours covered the great central valleys, the east Gulf states, Georgia, Tennessee, the western lower lake and southern upper lake region, while to the westward pressure has risen decidedly, with falling temperatures, so that the latter are once more seasonal in the plains states and the Rocky Mountain region. Over the eastern half of the country temperatures continue abnormally high.

The Lapland, reported as 600 miles east of Sandy Hook at 8 a.m. yesterday, is expected to dock Monday morning.

The Prince Friedrich Wilhelm, reported as 1,000 miles east of Sandy Hook at noon yesterday, is expected to dock Monday evening.

The Columbia, reported as 238 miles east of Sandy Hook at noon yesterday, is expected to dock this forenoon.

The Minnehaha, reported as 750 miles east of Sandy Hook at 11 a.m. yesterday, is expected to dock Monday forenoon.

The Star of India, reported as 380 miles east of Sandy Hook at noon yesterday, is expected to dock this forenoon.
